

CAPABILITIES BEING SOUGHT

Saab Australia's Global Supply Chain Team is seeking the following exportable technologies, products and services

COMBAT SYSTEMS

- Sensor Data Fusion
- Artificial Intelligence
- Human Interface Technology
- Cyber

SPACE

- Cloud Technology
- Space Domain Awareness

AUTONOMOUS SYSTEMS

- Command and Control
- Remote Sensing
- Underwater Datalinks
- Composite Materials
- Propulsion Systems

TRAINING

- Artificial Intelligence
- Training Simulation

SENSORS

- Radar Components
- Laser Range Finding
- Composite Materials
- Ruggedised, military-grade computer processing systems
- Electronic circuit boards

ELECTRONIC WARFARE

- Electronic Component Manufacture
- Data Correlation
- Test Equipment

WEAPONS

- Machined parts for missiles, anti-armour ammunition and weapons
- Non-metallic components for anti-armour ammunition and weapons

DEPLOYABLE INFRASTRUCTURE

- Portable power generation and distribution systems
- Modular structures
- Portable Facility Management Systems
- Composite Materials and design support

SIGNATURE MANAGEMENT

- Multispectral Signature Reduction Materials
- Fabric manufacturing

INTEGRATED SECURITY

- Sensor Technologies
- AI Data Fusion
